VISIT

THE PROGRAM

Two days. *Theory, then your hands.*

A tightly structured, one-to-one format — one day to build the foundation, one day to apply it on a real patient under direct supervision, followed by a full case review.

01 THEORY DAY Implant Surgery & Prosthetic Planning

- **Case selection & patient assessment** — reading CBCTs, bone quality, and ruling in or out candidates for implant placement.
- **Surgical protocol** — flap design, osteotomy sequencing, drilling protocols, torque and primary stability.
- **Prosthetically-driven planning** — starting from the final restoration and working backward to correct 3D implant position.
- **Restorative workflow** — abutment selection, impression techniques, cement- vs. screw-retained decisions.
- **Complications & management** — what can go wrong at each stage, and how to recognise and handle it early.
- **Your case, mapped out** — by end of day, your own case is planned in full, ready for surgery the next morning.

02 CLINICAL DAY Placing Your First Implant

- **Pre-op briefing** — a final walkthrough of the plan built the day before, matched against the actual patient.
- **Live placement, chairside** — you place the implant yourself, with direct 1-to-1 guidance at every step.
- **Real-time correction** — technique, angulation and depth adjusted and explained as you go.
- **Post-op protocol** — closure, instructions, and what to monitor in the days that follow.

Case review, together. Once placement is done, we sit down and go through the entire case from start to finish — what went well, what to adjust next time, and how to carry these decisions into your own future cases.

FEES & WHAT'S INCLUDED

Simple, *transparent pricing*

One flat program fee to get started, with straightforward pricing if you'd like to bring in additional patients of your own.

PROGRAM FEE

₹26,500

Includes your first implant & prosthetic fee in full

ITEM	FEE
2-day mentorship program (incl. 1st implant + prosthetic)	₹26,500
Each additional patient placement & restoration (optional — bring your own patients if you'd like extra practice)	₹7,500 / case

- 1-to-1 mentorship throughout
- Lunch provided both days
- Certificate on case restoration
- Ongoing WhatsApp mentorship

Restoration visit — 8 weeks later. Participants are required to return after 8 weeks to restore their placed case(s). This follow-up visit is a non-negotiable part of the program and ensures every case is carried through to a completed, functional restoration. **Certificates are issued once the case has been restored**, not at the end of the 2-day session.

Bring your own patients. Delegates are welcome to bring in additional patients of their own during the program if they'd like more hands-on placements — each further placement and restoration is charged at ₹7,500 per case.
